

close to the Stars, close to the Earth...

Caelestis fleur de vigne – the birth of an exceptional perfume

Perfume produced by the Higher School of Perfume in Paris

Caelestis is as pure and fresh as the morning dew and as complex as a Galaxy.....

An airy and natural perfume inspired by the stars and the Earth connected to the vine.

The perfume first takes off with scents of the vine flower and the freshness of hesperidium brought by the zest of Bergamot and Orange, with the green effect produced by the ingredient of the vine leaf.

The vine flower is ephemeral. It flowers only for a few days in June and announces the harvest 110 days later.

The heart of the perfume expresses itself thanks to natural aromatic herbs and hot spices such as the Cardamom and the Nutmeg which are enhanced by the vivacity of Rosemary leaves and Coriander seeds.

Roses are often planted near the vines to reveal their state of health, and it is this flower which brings its floral facet to this olfactory nectar. The essential oil of the Bulgarian Rose takes all its magnitude in this 'blending' and distills its velvety richness to compose this perfume.

Emmanuelle Giron, Perfumer-Teacher-Editor 'Les Mots du Parfum'

The Higher School of Perfume in Paris has graciously produced the perfume 'Caelestis fleur de vigne' for WWF.

Sustainable development is at the heart of the educational project of the school and therefore our participation in this project fits perfectly in the syllabus.

Inspired by the green and fresh vine flower, the perfume produced is 100% natural with organically cultivated ingredients. It was conceived according to ecological criteria.

The perfume ingredients were graciously offered by: **CRISTALCO, Caribbean Flavours & Fragrances (CFF) SA, CAPUA, HODES EXTRACTS (PVT) LTD, Plantes Aromatiques du Diois**, as well as **Al Pa Ca Sa**.

The educational team involved was; Emmanuelle Giron (perfumer), José Adrian **JLA Consulting** (sourcing), Sandra Vade (regulations), Laurianne MILLOT (packaging) with the help of the company **A2PH** (composition/making).

This project was carried out within the framework of an unprecedented collaboration between a higher school and institutional partners.

The Higher School of Perfume in Paris is the only institution which trains in 5 years future professionals of the perfume industry across the entire value chain of the sector: from the raw materials to the production, from the marketing to the sales and distribution.
